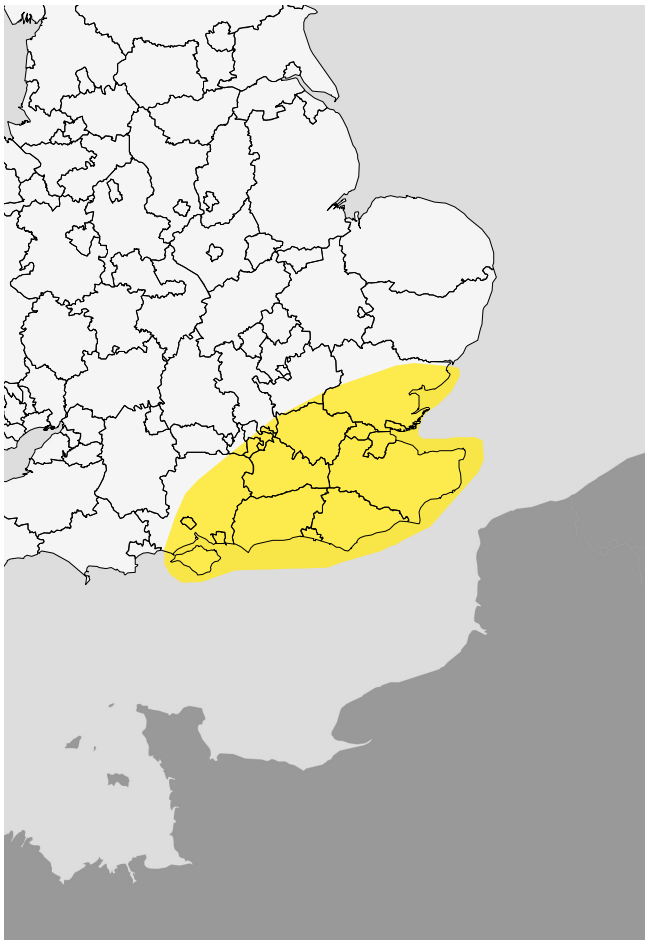
Yellow warning
Rain

Between
06:00 Fri 20 Oct 2023 and
20:00 Fri 20 Oct 2023



There is a chance that a period of heavy rainfall, on top of recent rain, could bring some disruption on Friday

What to expect

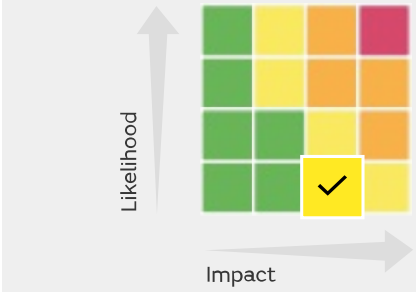
- There is a small chance that homes and businesses could be flooded, causing damage to some buildings
- Spray and flooding is likely to lead to difficult driving conditions and there is a small chance of some road closures
- Where flooding occurs, there is a slight chance of delays to or cancellations of public transport services

Further details

An area of low pressure arriving from the south could bring a 6-12 hour period of heavy rain to parts of southeast England.

Confidence is currently very low for precise details, but there is a chance of 30-50mm widely across this area and a small chance of as much as 75 mm in a few places, these most likely over parts of Sussex, Kent and Essex. On top of preceding rain, this is thought to be sufficient to cause disruption.

Strong easterly winds may affect eastern coastal areas too, with some large waves and dangerous coastal conditions developing in places.



✓ Very low likelihood of medium impacts
